-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 18 June 2001.

2a) This action is FINAL. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-52 is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1-14, 17, 20, 21, 28-33, 36, 38-43 and 46 is/are rejected.

7) Claim(s) 15, 16, 18, 19, 22-27, 32-35, 37, 44, 45 and 47-52 is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

11) The proposed drawing correction filed on _____ is: a) approved b) disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.

12) The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some * c) None of:

1. Certified copies of the priority documents have been received.

2. Certified copies of the priority documents have been received in Application No. _____.

3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).

a) The translation of the foreign language provisional application has been received.

15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413) Paper No(s). _____
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____	6) <input type="checkbox"/> Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-19 are directed to an apparatus. However, the essential structural cooperative relationships between elements in the claims have been omitted, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 5, 8, 10, 12, 13, 14, 17, 20, 21, 28-33, 36, 38-43, and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Larson et al.

At the outset, it is noted that similar claims will be grouped together to avoid repetition in explanation.

As broadly drafted, these claims do not define any structure/step that differs from Larson et al. With regard to claims 1, 8, 10, Larson discloses a multiple processor computer system comprising: a plurality of processors (62 (1-N)); a shared resource (72/72', for example); a main memory (74, for example), at least a portion thereof comprising a control structure for controlling a lock on said shared resource; and a crossbar structure (spinlocks 104/110/112/hash table 80) for controlling access among the processors to the shared resource, the crossbar structure (spinlocks 104/hash table 80) comprising, for each processor, a corresponding storage location (90/102, for example), one of the plurality of processors (62(1-N)) writing to a storage location corresponding to the one processor, an address of the lock control structure associated with said shared resource to acquire the lock thereto, the crossbar structure (spinlocks 104/110/112/hash table 80), on behalf of the one processor, performing memory operations on the lock control structure at the address specified in the corresponding storage location in order to acquire the lock on behalf of the one processor. With regard to claim 2, the crossbar structure (spinlocks 104/110/112/hash table 80) further comprises a second storage location (any other correspondent 90/102) corresponding to a respective processor (any other processor (62(1-N)) in the multi-processor system, one of the plurality of processors writing to the corresponding second storage location an address of the lock control structure associated with said shared resource to release the lock thereto, the crossbar structure, on behalf of the processor, performing memory

operations on the lock control structure at the address specified in the corresponding second storage location in order to release the lock on behalf of the processor. With regard to claim 5, the crossbar structure further comprises a queue (represented by a plurality of tables/pointers) for determining which processor is granted a lock. With regard to claim 12, it is clear that the shared memory includes a register. With regard to claims 13, 14, 17, see above. With regard to claims 20, 21, 28-33, 36, 38-43, and 46, one using the apparatus of Larson et al. would have performed the same step/instruction set forth in claims 20, 21, 28-33, 36, 38-43, and 46.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Larson et al.

Larson et al., as explained above, discloses the claimed invention. Larson et al. does not disclose that "at least two processors" can be placed in a board or "module." It would have been obvious to one of ordinary skill in the art at the time the invention was made to place at least two processors of Larson et al. in a board or "module", since such a modification is only a matter of design choice and clearly within the level of skill in the art. If Applicants choose to challenge the fact that a plurality of processors can be

commonly placed on board(s) or module(s), supportive documents will be provided upon request.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Larson et al. in view of Henriksen.

Larson et al., as explained above, discloses the claimed invention. Larson et al. does not disclose use of a shared I/O. Henriksen discloses the use of a shared I/O for a plurality of processors. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Larson et al. with a shared I/O, as taught by Henriksen, for the purpose of extending the capability of the system of Larson et al. by supplying it with a peripheral or I/O resource shared by a plurality of processors.

Allowable Subject Matter

Claims 15, 16, 18, 19, 22-27, 32-35, 37, 44, 45, 47-52 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 3, 4, 6, and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

US Patent Nos. 5,502,840 to Barton, 6,047,316 to Barton et al. are cited as relevant art.

Any inquiry concerning this communication should be directed to Khanh Dang at telephone number 703-308-0211.
